Edgentik

INTRODUCTORY OFFER

# See where and when risks repeat on your site.

A four-week evaluation on the cameras you already have, or on ours where you have none. Pick one condition in one area. We measure it and check the count against your own video.

**C$800**
**Introductory evaluation price**
Edge box and setup included
Uses your cameras

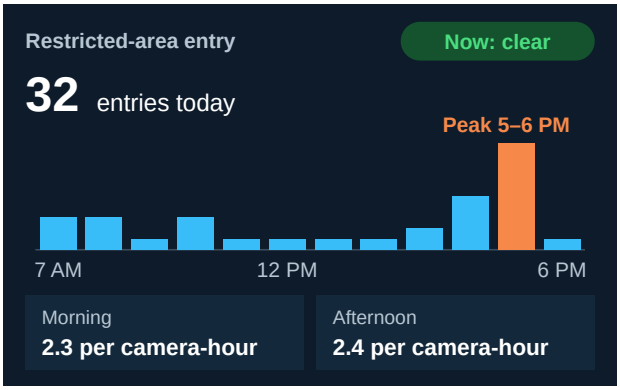

**4 weeks**
One area · One condition

**No camera?**
We bring ours, quoted by camera count and connectivity

## WHAT WE MEASURE · PICK ONE FOR THE EVALUATION

**Safety**
- **Restricted-area entry · start here**
- Staying too long
- Forklifts near people
- Missing visible PPE

**Operations**
by discussion
- Forklift dwell at transfer points
- Area occupancy
- Recurring congestion

Example: restricted-area entry, simplified from Edgentik's live view of its own test setup, one day in October 2026.

## WHAT YOU GET

**A count you can trust**
We check the counts together against actual video in week one.

**When it keeps happening**
Entries by hour, as a rate per hour the camera could actually see the area.

**Video evidence**
Video clips to review alongside the counts.

**A written readout**
Where and when it repeats, and where to act first.

### 1 Fit check
**BEFORE YOU AGREE**
Send one camera view. We tell you if it can be measured.

### 2 Set up and check
**WEEK 1**
We install the edge box, mark the zone with your supervisor and check the count.

### 3 Measure
**UP TO WEEK 4**
Normal operations. You can watch it live.

### 4 Readout
**END**
We walk you through the findings. You decide: continue or stop.

## YOUR SITE PROVIDES

- Cameras on the area (or room for ours), network access
- One person who owns the problem
- Your operating hours and shifts

## IF YOU CONTINUE · INTRODUCTORY

Your team makes a change. We keep measuring to see if the number goes down.

**C$800/month per site**, up to 4 cameras, edge box included. No obligation to continue after the evaluation.

**Measures conditions, not people.** No facial recognition. No worker scoring. Video is analyzed on site; only selected clips are uploaded for review. The evaluation fee is not credited to the subscription; if you stop, we collect the edge box and you keep the readout. The readout shows where and when, not why; your site decides the cause and the action.

## Next step: a quick fit check.

Send one camera view and the problem you want to measure. We'll tell you whether it can be measured before anything is installed or agreed.
